

Understanding Your Data Trend Report

The top four improvements represent the indicators that showed the greatest percent change.

ATLANTA Data Trend Report 2009-2013 (Atlanta-Sandy Springs-Marietta, GA)

Atlanta's total score has ranked among the top 25 metropolitan areas since 2009. Strengths include a decrease in the death rate for diabetes, as well as a high number of recreational facilities per resident, including golf courses, recreation centers, swimming pools, and tennis courts.

Top four improvements since 2009:

- * The number of farmers' markets per 1,000,000 increased from 0.8 to 1.1.
- * The number of dog parks per 10,000 increased from 0.2 to 0.4.
- * The percent of city land area that is parkland increased from 4.5% to 5.7%.
- * The death rate per 100,000 for diabetes decreased from 19.3 to 15.4.

Measure	2009	2010	2011	2012	2013	% Change 2009-2013
Total Score	59.3	57.7	55.2	53.8	53.6	-9.6%
Total Ranking	15	16	18	21	21	

The percent change was calculated by subtracting the 2009 value from the 2013 value and dividing that change by the 2009 value.

Personal health goals were derived by generating the 90th percentile from the pooled 2008-2012 AFI data sets.
